MARCHING FORWARD

Multi Commodity Exchange of India Limited (MCX) is India's premier stock exchange, offering commodity derivatives and regulated by the Securities and Exchange Board of India (SEBI). The Exchange is a public listed company with a market capitalization of ₹270 bn* (USD 3.15bn*). MCX offers a platform for online trading of derivatives in several commodities and indices, backed by an Investor Protection Fund (₹2.78 bn*), while the trades are cleared by MCX Clearing Corporation Ltd, the fully owned clearing subsidiary of MCX, whose risk management system is backed by a Settlement Guarantee Fund (₹9.30 bn*).

* As on 31th March 2025

OUR VISION

We envision a unified Indian commodity market that is driven by market forces and continually provides a level playfield for all stakeholders ranging from the primary producer to the end-consumer; corrects historical aberrations in the system; leverages technology to achieve exceptional efficiencies and ultimately lead to a common world market. We also envision a brand image for MCX that identifies it as the Exchange of Choice not only by direct participants in the commodity ecosystem but also by the general public.

PIONEERS OF THE INDIAN MARKET

- First to introduce evening trading to match international market hours
- First exchange to be listed
- First exchange to launch options contract in commodities
- MCX Clearing Corporation Ltd - first clearing corporation in the commodity derivatives market
- First exchange in the world to launch deliverable 1 gram Gold contract
- First exchange to launch futures on bullion and metal indices

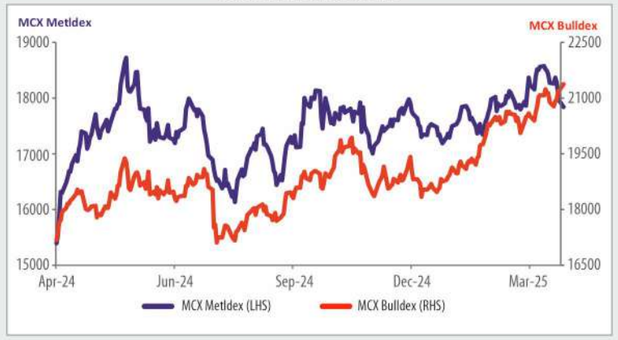
MCX iCOMDEX INDICES

MCX India Commodity Indices (MCX iCOMDEX) are excess return indices which consist of:

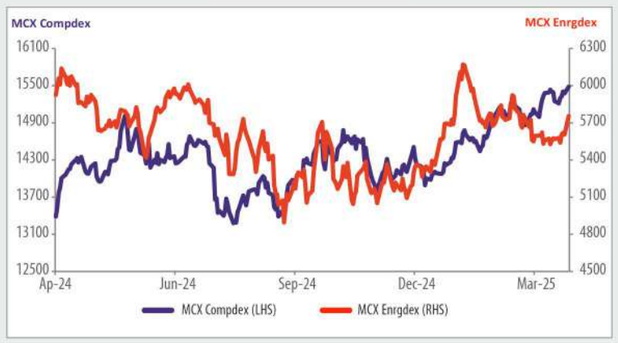
- Single Commodity Indices of Gold, Silver, Aluminium, Copper, Lead, Zinc, Crude Oil and Natural Gas.
- Sectoral Indices of Bullion, Base Metal and Energy
- Composite Index

Certified for following governance standards as prescribed by IOSCO Principles for Financial Benchmarks

MCX METLDEX and BULLDEX



MCX COMPDEX and ENRGDEX



THE IMPACT: CO-CREATION OF VALUE

Independent impact assessment of MCX established that MCX platform:

- Enabled India Lead Prices to be discovered by adopting India goods delivery norms and Empanelling domestic refined Lead Producers (IIT Kharagpur, 2024)
- Provides efficiency, measured by Information Leadership Share and Social Loss Index, in Aluminium and Zinc futures, which is comparable to those of global exchanges (IIT Kharagpur, 2021)
- Presents a mechanism to metal using firms to update their industry outlook and budget their future expenditure (IIM Ahmedabad, 2019)
- Provides reference prices to cotton growers to start negotiations; and also encourages improvement of storage and grading infrastructure (NIAP, 2017)
- Ensures stable prices for SMEs (TISS, 2012)
- Facilitated the rise of India as world's top exporter of processed mentha crystals (IIM Calcutta and NISTADS, 2012)
- Enables Farmer Producer Organizations (FPOs) to deliver their produce and hedge their price risks.

TOWARDS *ATMANIRBHAR BHARAT*

As on 31st March 2025, MCX has empaneled seven Indian refined Lead producer facilities and five Indian Gold refiners as eligible deliverable brands of Lead and Gold respectively for MCX Good Delivery, with the objective of creating a India-based benchmark price for these metals.
