
A Monk Who Trades
What are futures contracts in derivatives trading?
A futures contract is an agreement to buy or sell an underlying asset at a certain price on a future date.
I predict a very bright future for myself.
Are the obligations of the buyer and seller. The same?
Futures contracts obligate both the buyer and seller to fulfil the terms of the contract upon expiry!
Is there any prior payment required?
All required margins are to be deposited and maintained by both parties.
DID YOU KNOW?
Futures contracts grant the right and impose obligations on both parties to honour the contract

WE TAKE OUR COMICS VERY SERIOUSLY

"A Monk Who Trades" initially served as a means to educate our stakeholders about the intricacies of exchanges and their operations. We aimed for it to be informative while avoiding academic dryness. That's when we realized that humour could be the perfect medium to convey our message, leading to the birth of this comic strip.

In a tightly regulated field often associated with serious business, our approach has been met with outstanding reception. That's why, as we celebrate our fifth anniversary, we've decided to mark this occasion with a book that documents our journey thus far. We hope you enjoy reading it as much as we enjoyed creating it.
