MCX INVESTOR PROTECTION FUND

MCX releases "The Commodity Insights Yearbook 2022"

featuring several policy initiatives, recommendations and insightful articles to raise awareness on "Energy" as a segment.

Mumbai, October 14, 2022: MCX Investor Protection Fund (MCX IPF) and National Institute of Securities Markets (NISM) released today 'The Commodity Insights Yearbook 2022', a joint annual publication aimed at raising awareness and increasing knowledge about the commodity derivatives market and related products among various stakeholders.

This edition of the Yearbook focuses on 'Energy' as a segment, and carries insightful articles on various elements related to this segment in its emerging trends section. The issues and perspectives around Energy commodities have always been of high interest and have gained much prominence in the Covid and post-Covid period.

Energy markets need to be understood well not only for grasping the significance of geopolitical events which lend great uncertainty to these markets, but also to comprehend the myriad issues which would become important in the days to come, viz. issues around green energy, electricity derivatives, electric vehicles, etc.

As the commodity markets expand and evolve, it is essential to raise awareness levels among the market players and stakeholders in commodity value chains. It is also necessary to evoke research interest in the academic community, so as to explore and create new knowledge pertaining to commodity markets.

On the release, Mr. P.S. Reddy, MD & CEO MCX, said, ***"The Commodity Insights Yearbook is an earnest attempt that serves as a useful compendium in terms of both data and articles. I am sure our stakeholders and academicians would find the Yearbook helpful and relevant and hope that it remains a benchmark resource for information on the commodities derivatives markets in India."***

With an endeavor to reach out to all those interested, especially researchers, analysts and users worldwide, the *Commodity Insights Yearbook* along with useful time-series data in 'easy-to-use' spreadsheets, is also made available on the MCX website for free download and usage.

About MCX:

Having commenced operations on November 10, 2003, Multi Commodity Exchange of India Limited (MCX) is India's first listed, national-level, electronic exchange and India's leading commodity derivatives exchange with a market share of about 96.4 per cent in terms of the value of commodity futures contracts traded in financial year 2022-23 (April–June 2022). MCX offers the benefits of fair price discovery and price risk management to the Indian commodity market ecosystem. Various commodities across segments are traded on the Exchange platform. These include bullion, energy, metals and agri commodities. The exchange has forged strategic alliances with various international exchanges, as well as Indian and international trade associations.
