# MCX to roll out options trading in crude oil

MUMBAI

Multi Commodity Exchange of India will roll out options trading with crude oil futures as the underlying on May 15. The exchange received SEBI's approval last week. Two crude oil options contracts expiring on June 15 and July 17 will be available for trading on the day of the introduction. The lot size of the option contract is the same as the underlying crude oil futures contract (i.e. 100 barrels).
