Trading Activities Restored to Normal on July 11, 2018

Mumbai, July 12, 2018: Subsequent to the second trading halt at the Exchange platform on Wednesday, July 11, 2018, the exchange recommenced live trading at 04:11 p.m. The Exchange did not cancel any orders/trades from its end. The exchange concluded its session at 11:30 p.m. as per normal schedule. The end of day activities across trading, surveillance, clearing & settlement were completed as per regular schedule. Data integrity and other checks have been performed to satisfy and assure that there has been no impact on any of the surveillance, risk margining and any other pre or post-trade activities.

In our analysis alongside the software vendor, our technology team observed some aberration in the TCP stack of messaging layer. To avoid such potential cause leading to any further issues, corrective measure has been taken in consultation with original equipment manufacturers (OEM). Our technology team continues to work with the software vendor and OEMs for carrying out detailed analysis.

The exchange sincerely apologizes for the inconvenience caused to the members and participants, and at the same time is grateful for their support and cooperation. It is firmly committed to deliver the highest levels of service to all its stakeholders and will continue to work towards improving the systems/ processes.
